

RESOURCES TO PDT/PCI RELATED RESEARCH, 2012

The Norwegian Radium Hospital Research Foundation will also for 2012 distribute resources to photodynamic therapy and photochemical internalization (PDT/PCI) related research. In 2011 we funded various research projects within this field with a total of NOK 0,9 million. Employees at the Oslo University Hospital are welcome to apply. If you have received resources from previous PDT/PCI projects, you must provide a project report with your new application.

The closing date for applications is January 20th, 2012.

Applications, containing a description of the project, can be sent to:

Radiumhospitalets Forskningsstiftelse, v/ Bente Prestegård,
Vollsveien 6, 1366 Lysaker.
